

**Further details and photos at bottom of gazebo page.**

### **How many side walls do I get in this package?**

You will receive a complete set of four side walls, and each side wall can be added or taken down individually, so you have endless options! In each side wall set we provide you with 1 x door entry panel, 1 x plain panel, and 2 x window panels. A window wall features a large plastic panel that allows light and vision into your awnings. If you want to block light or block people from seeing inside your awning, simply fold down the window cover in less than 20 seconds!

### **Does my complete package fit inside the carry bag?**

Yes, the F2 new roller wheel carry bags have a re-enforced bottom to ensure years of trouble free use. Just pop the frame, with the canopy still attached, inside the roller bag and because we've added a large pouch to the outside you can now put your side wall set and tie down kit away in one bag! Everything you need is now safe and in one place, with the added bonus of easy transportation because of the roller wheels!

### **How much warranty do you offer?**

All F2 gazebos come complete with a 12 month warranty on materials (roof and side wall )

### **Do I need weighted feet or will my tie down kit suffice?**

This is a tough question because the weather varies so much in the UK! Where weighted feet really come in handy is on hard ground, where you can't make use of the tie down ropes and stakes that are supplied with this package. If you are on soft ground in reasonable weather then there's no need for weighted feet – but if the weather turns, an extra 60kg of weight (15kg per corner) can really come in handy!

Just to give you an idea of space, a 3m x m size Instant Awning could accommodate any one of the following:

- A medium sized car**
- 8-10 people seated**
- 1 Go Karts plus mechanics & tools**
- 2 Motorbikes plus mechanics & tools**
- A barbeque and four chairs**
- and much more.....**

Wheeled carry bag

Guttering for joining two gazebo/awnings together
